

**WARNING**

1. To prevent electric shock or instrument failure, always turn off the system power before replacing mounting or moving the instrument and sensor. Contact tor or SSR/SCR
2. To prevent electric shock or instrument failure, do not turn on the power until all the wiring is completed.
3. To prevent interruption, input signal wire must be isolated with main power wire.
4. To check if the connecting sensor matches with selected input before use.

**Display unit & Indication lamps**

<b>PV</b>	= Measured value display
<b>SV</b>	= Set value display
	= Alarm 1 output lamp
	= Alarm 2 output lamp
	= Alarm 3 output lamp
	= Control output 1 lamp
	= Control output 2 lamp
	= Autotuning lamp
	= Manual mode lamp
	= Manipulated output value display
	= Programmable mode lamp
1-8	= Segment-in-process display lamp
RP	= Ramping mode lamp (programmable mode only)
SK	= Soaking mode lamp (programmable mode only)

**Operation keys**

	=Function & Set key
	=Shift key
	=Down key
	=Up key
	Press 3 sec while the SV is not flashing = Used for returning to initial window
	Press 3 sec while in level selection window = Used for calling up lock function
	Press 3 sec while in pv/sv initial window= Used for stopping output and SV window will display "HOLD"  press 3 sec again to regain output (This function is available only while OUTM is selected 1 or 2)
	Press 3 sec while in pv/sv initial window = Used for calling up level selection
	Press 3 sec while in level selection window = Used for entering each level

**Operation keys (programmable mode only)**

	3 SEC =Run PRG lights, RP or SK flashes The executing segment lamp lights
	3 SEC =Pause PRG, RP and SK light The executing segment lamp lights
	=Jump Jump to the next segment, press  first
	=Stop Turn off all lamps which used for programmable mode, press  first
Refer to arrow  When PRG Lights (No PRG light in H-D48)	

**Window checks display after turning on power**

**A How to set "SV" example: SV set at 200°C**

**B How to set "AL1S,AL2S,AL3S" example: alarm 1 set at 20 C**

**C How to set "AT" (auto tuning)**

**D How to enter different "level" for setting parameter**
